0.027 AND 0.032 ALUMINUM GUTTER COIL

Use:

Roll form into gutter trough.

Feature:

The aluminum gutter coil is made from 0.027 and 0.032 3105 aluminum alloy. It is a harder coil that runs better in gutter machines and produces stiffer gutter. This makes it easier to carry long pieces up a ladder and helps reduce the chances oil canning and heat buckling.
